

**BIG DATA** offers many big promises. And, in most cases, it requires a big commitment upfront before any value can be realized. But now, Tectonic is enabling organizations to explore those big promises for 30 days or more – without the big commitment. Provelt, Tectonic’s 30-Day Big Data Analytics proof of value (POV), keeps the focus on value instead of the underlying technologies necessary for uncovering that value.

**What’s included:**

- \* **Identifying high-value opportunities through a team-based workshop;**
- \* **Provisioning necessary resources in the cloud;**
- \* **Loading necessary data and create visualizations; and**
- \* **Full documentation on use case(s), findings, and supporting technologies.**

**Optional features:**

- \* **Integrating with existing enterprise data infrastructure;**
- \* **Integrating/evaluating of existing enterprise analytics tools; and**
- \* **Mentoring of team members on tools and techniques.**

**If you’re ready, let’s Provelt!**
